Summary

Final-year B.Tech Computer Science student who builds AI systems in Python, including multi-agent platforms and a Model Context Protocol (MCP) server in active production at Etzel IT Solutions. Delivered 6+ industry-ready, operational products from 15+ industrial client visits, with experience in data pipelines and LLM backends. Seeking an AI or data engineering internship to turn raw data into reliable, production-ready systems.

Education

Jawaharlal Nehru Engineering College, MGM University — Chhatrapati Sambhajinagar
Bachelor of Technology in Computer Science | CGPA: 8.62/10 — *Expected May 2027*

Experience

Software Engineering Intern — May 2026 – Present
Etzel IT Solutions

- Shipped 6+ industry-ready products that are operational today by turning requirements from 15+ industrial client visits into scalable architectures

Aerospace Technical Intern — Feb 2026 – Apr 2026
Indian Space Lab

- Sped up drone telemetry analysis in live flight tests by engineering Python, Pandas and NumPy data pipelines

Projects

AURUM Emergency Intelligence Platform | *Python, FastAPI, Node.js, React, WebSockets*

- Built a multi-agent emergency medical dispatch platform with four engines (APEX, ORACLE, NEXUS, HELIX), using WebSockets and Integer Linear Programming to optimise real-time, constraint-based routing

SAP-BTP-MCP System | *Python, Model Context Protocol, Google Cloud, SAP BTP*

- Streamlined daily operations and workflows for all company employees, now in active production at Etzel IT Solutions, by engineering and deploying a secure Model Context Protocol (MCP) server for deterministic LLM analysis of SAP BTP data

AegisOps Autonomous Cloud Remediation | *LangChain, Python, FastAPI, React, WebSockets*

- Cut mean time to recovery (MTTR) by 95%, with about $513K in projected incident-cost savings, by engineering an autonomous dual-LLM backend that runs Site Reliability Engineering (SRE) remediation

Technical Skills

Languages: Python, SQL, TypeScript, JavaScript, Java, C/C++, Rust, Go
AI/ML & Data: Machine Learning, Model Training, RAG Pipelines, Multi-Agent Systems, LangChain, LangGraph, Model Context Protocol (MCP), Data Pipelines, Data Pre-processing
Libraries: PyTorch, scikit-learn, Pandas, NumPy
Frameworks: FastAPI, Node.js, React.js, Next.js, REST APIs
Developer Tools: Google Cloud Platform (GCP), SAP BTP, Docker, Kubernetes, Git, GitHub, Linux

Leadership & Achievements

Administrator & Technical Head — Sep 2025 – Present
Blackbox AI Maverick Club

- Scaled the club to 1,000+ members and 200+ active developers via 4 AI/ML seminars for 400+ students

Event Management Head — Jan 2026 – Mar 2026
TEDxMGMU

- Delivered an event for 1,000+ attendees by leading a 64-member committee under TEDx licensing guidelines

Google Student Ambassador — Aug 2025 – Aug 2026
Google

- Engaged 800+ students and mobilised 1,200+ members in Google campaigns, securing Gemini student offers
