Education

B.Tech, Computer Science

Jawaharlal Nehru Engineering College, MGM University, CSN | Expected May 2027 | CGPA - 8.62/10

Technical Skills

- **Languages:** Python, TypeScript, JavaScript, C/C++, Java, SQL, Rust, Go
- **AI, Machine Learning & Data:** Machine Learning, Model Training, Data Preprocessing, PyTorch, Scikit-learn, NumPy, Pandas
- **Frameworks & Web:** FastAPI, Next.js, React.js, Node.js, LangGraph, LangChain
- **Tools & Infrastructure:** Git, GitHub, Docker, Kubernetes, REST APIs, Linux
- **Domain Expertise:** MCP Systems, Multi-Agent AI Systems, RAG Pipelines, Quantum Information Science, Blockchain

Professional Experience

Software Engineering Intern - Etzel IT Solutions

May 2026 – Present

- Engineered 4+ industry-ready software products, translating requirements from 15+ industrial client visits into scalable architectures.

Aerospace Technical Intern - Indian Space Lab

Feb 2026 – Apr 2026

- Engineered pipelines using Python, Pandas, and NumPy to accelerate drone telemetry data analysis during live flight tests.

Key Projects

AURUM: Emergency Intelligence & Dynamic Routing Platform

Python, FastAPI, Node.js, React, WebSockets

- Optimised real-time emergency response and constraint-based routing by engineering a 4-engine AI platform (APEX, ORACLE, NEXUS, HELIX) featuring dynamic WebSockets and Integer Linear Programming algorithms.

SAP-BTP-MCP System:

Python, Model Context Protocol, Google Cloud, SAP BTP

- Streamlined daily operations and workflows for all company employees in active production at Etzel IT Solutions by engineering and deploying a secure Model Context Protocol (MCP) server to enable deterministic LLM analysis on SAP BTP data.

AegisOps: Autonomous AI Cloud Remediation

LangChain, Python, FastAPI, React, WebSockets

- Slashed Mean Time To Recovery (MTTR) by 95% and could reduce potential incident costs by ~\$513K by engineering an autonomous dual-LLM backend to instantly execute Site Reliability Engineering (SRE) remediation.

Leadership & Achievements

Administrator & Technical Head | Blackbox AI Maverick Club

Sep 2025 – Present

- Scaled an AI/ML organisation to 1,000+ community members and 200+ active developers by delivering 4 hands-on seminars on multiple AIML topics to directly educate 400+ students.

Google Student Ambassador | Google

Aug 2025 – Aug 2026

- Engaged 800+ students in Google's community, successfully securing Gemini student offers, and mobilised 1,200+ members across active Google campaigns by executing core GSA tasks.

Event Management Head | TEDxMGMU

Jan 2026 – Mar 2026

- Delivered a high-impact community experience for 1,000+ attendees by supervising a 64-member organising committee to orchestrate end-to-end operations under global TEDx licensing guidelines.
